The following provides the tabulated results of the Survey taken by the PBPG earlier this year. 165 responses were received to the 810 surveys delivered by US Mail for a statistically significant 20%. Where residents preferences were clearly defined by the results, the PBPG Board will use that information to maintain or change positions on Peninsula issues. All suggestions and concerns written are listed and topics/speakers for future General Meetings are noted. Thanks to those that offered to support Peninsula activities such as CERT, Santa, etc. – the appropriate Director will contact you.

The first 13 questions were ranked 1-5 with 1 a major problem and 5 no problem. The results are given in percentage of the total replies to that question
